Guarantees and benefits are subject to the claims-paying ability of Symetra Life Insurance Company.

Symetra Edge Pro Fixed Indexed Annuity has fixed and indexed accounts. Interest credits for indexed accounts are affected by the value of outside indices. Values based on the performance of any index are not guaranteed. The contract does not directly participate in any outside investment.

Interest in the indexed accounts may not be credited due to the method used to calculate and credit interest.

Interest is not credited between the dates the purchase payments are received and the date the contract is issued.

Indexed interest cap rates and fixed account interest rates may be reset at the end of each interest term.

The fixed account interest rate will never be less than the fixed account guaranteed minimum interest rate (GMIR) stated in the contract. After the initial guaranteed interest rate period, the interest rate can be reset at the end of each interest term, but it will never be less than guaranteed minimum interest rate stated on the contract.

Subsequent indexed interest caps may be higher or lower than the initial indexed interest cap but will never be less than the guaranteed minimum indexed interest cap.

The indexed interest floor is the minimum indexed interest rate that can be credited to the indexed account value in any interest term.

Interest rates and indexed interest caps are subject to change without notice.

Interest rates may vary on any subsequent purchase payment(s).

A Market Value Adjustment feature (MVA) is a positive or negative adjustment that may apply when all or a portion of the contract value is withdrawn. A MVA will apply to a withdrawal of more than 10% of the contract value in a contract year during the surrender charge period. It may also apply upon death or annuitization but only if it results in a cash surrender value higher than the contract value that would otherwise be paid. A negative MVA can never cause the cash surrender value to be less than the guaranteed minimum value. After the surrender charge period, no MVA applies.

Tax-qualified accounts such as IRAs, 401(k)s, etc. are tax-deferred regardless of whether or not they are funded with an annuity. If you are considering funding a tax-qualified retirement plan or account with an annuity, you should know that an annuity does not provide any additional tax-deferred treatment of earnings beyond the tax-qualified plan or program itself. However, annuities do provide other features and benefits, such as death benefits and annuity payment options.

Withdrawals may be subject to federal income taxes and a 10% IRS early withdrawal tax penalty may also apply for amounts taken prior to age 59½. Consult your attorney or tax advisor for more information.

The contract provides a guaranteed minimum value upon surrender, death, or annuitization. Please see a current rate sheet or contact us at 1-800-706-0700 for more details.

<sup>1</sup>First Year Interest Rate is the Base Interest Rate + 0.50% Additional Interest.

<sup>2</sup>Effective interest rates are based on the current interest rates and the specified length of time. It is assumed that the Guaranteed Minimum Interest Rate is credited after the initial guaranteed interest rate period.
